TDD# 95-06-0006

FROM: Nancy Smith 
Site Assessment Manager

THRU: Sharon Hayes
Work Assignment Manager

TO: Jocelyn Boesch
Weston START

As I discussed with Jack Padden, the site manager, I have the following comments on the Task Work Plan for this site:

I suggest moving samples SD-05 and SD-06 further south to a more "background" location. Sample SD-06 need only be analyzed for inorganics. I prefer more than one background sample to be analyzed for metals to characterize their natural variation in soils, but don't require multiple background analyses for non-naturally occurring contaminants (VOAs, SVOAs, PCBs, etc.).

I suggest deleting sample SD-08, or moving it to any spot which looks like a possible "hot spot" during the sampling visit. I also suggest moving sample SD-07 to a more likely "hot spot". It is not necessary to collect "background" samples specifically for SD-02. Samples SD-05 and SD-06 will serve as backgrounds for all of the wetlands samples.
